

Installation Instructions for Wall Mount Linear Extrusion

1. Install as per Electrical Code by a certified Electrician.

2. Remove opal lens with a slotted screw driver. Be careful not to scratch the extrusion or crack the lens. **Do Not remove endcap.**

Unscrew the LED plate and disconnect the power to the LED strips

3. Screw wall mount plate into the drywall. Relocate power to side of fixture and attach mating wall mount bracket to fixture.

4. Wire fixture to using proper wiring practices and carefully insert all marrets inside the mounting plate. Attach the bracket to the wall by inserting and mating the brackets as shown.

Finally insert 2 pairs of screws to secure the brackets and to prevent them from lifting out after installation.

5. Reconnect the power to the LED plate and fasten the plate with the screws. Reattach the opal lens to the fixture.

Test light fixture.
